

PROCURE TO PAY

Door-Step Garage Service Start-Up In India

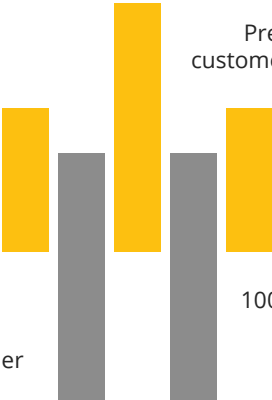

This company is a cloud-based prognostic maintenance platform that enables enterprises and consumers to leverage the wealth of data available from their vehicle fleets. E.g. they help Uber manage their fleet maintenance. They serve consumers across major cities like Bangalore, Delhi etc.

Xampr makes it possible to orchestrate data & process flow across mechanics, fleet manager, tier 1 suppliers, OEMs, insurance companies and the aftermarket suppliers, in real-time.

Real-time procurement of spare parts and supplier orchestration

Xampr's realtime capability makes the business model possible, for JIT door-delivery of garage service; subsequently tech enabled them to showcase scale & unit economics to secure series B funding

<20mins spare part order to delivery from door step.
Orchestrates live bidding of supplier across cost & delivery time SLA

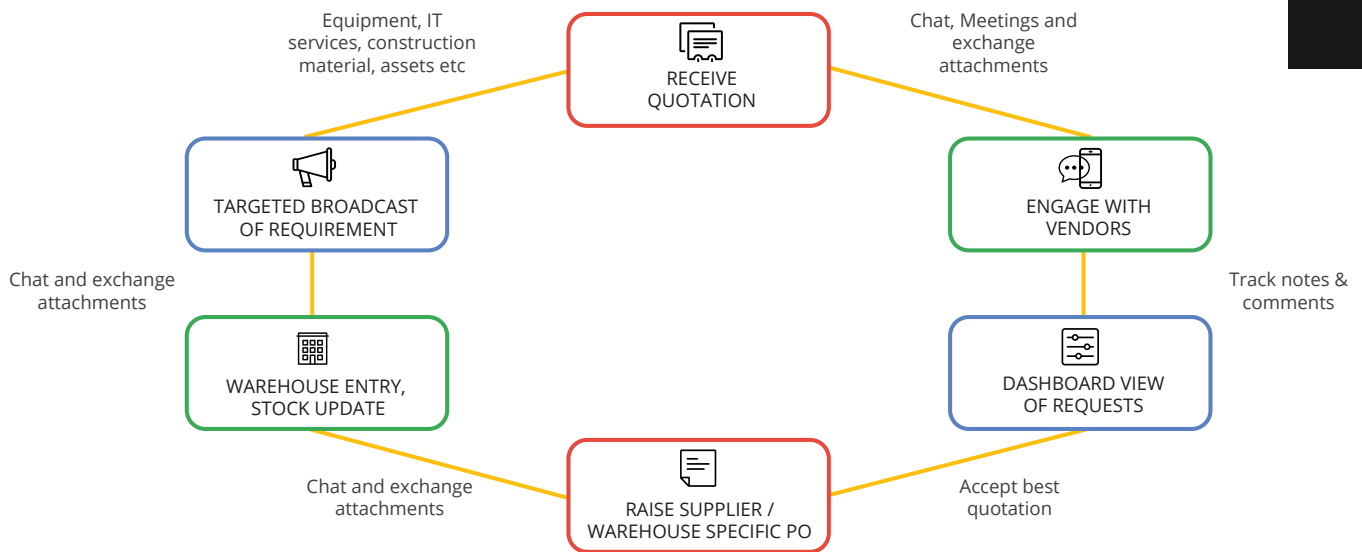

Predictable ETA and customer SLA adherence

3 dev months of Xampr micro-app effort, compared to several man years of custom mobile app dev

100% audit trail; Zero pilferage; Zero settlement reconciliation errors

SAMPLE WORKFLOW

How it WORKS

Bringing teams and functions together to collaborate in real time in a flexible manner
